(By Associated Press)  
ROME, Sept. 7.—Government officials will open negotiations with the general industrial conference at Milan Thursday with a view to solving the problem presented by the seizure by workers of metal factories through Italy. It is estimated that 400 of the largest metal works in Italy have been occupied by the mechanics and workers, and elaborate steps will be taken by the government to preserve order during the period when the general offensive against all the industries are threatened.

### STATE HAS HALF GRAM OF RADIUM

Bureau of Mines at University Gets Small Amount of Precious Metal

One-half a gram—that isn't very much in weight, but it is a whole lot of radium, and it is soon to have a home at the University of Nevada. It is part of the equipment of the government mining experiment station which will soon be in operation at the university, and is worth \$50,000.

President Clark of the university told of the radium in a short talk to the members of the Rotary club of Reno in which he also spoke on conditions at the university and plans for the coming semester. Dr. Clark pointed out that the experiment station is known as a rare and precious metal station and would consider problems in rare and precious metals from all parts of the country.

He also devoted much of his talk to a discussion of athletics, scholarship and physical training for the men. "The trip to the Hawaiian Islands to be taken by the football team in December is a great honor for the university," he said, "and will be one of the most enjoyable trips ever taken by a Nevada team."

In conclusion Dr. Clark predicted that the enrollment of students would be about 400 during the first month, which is about 40 more than last year.

## REPRESENTATIVE OF COX UNDER DIRECT QUESTIONING UNABLE TO PROVE ANYTHING

(By Associated Press)  
CHICAGO, Sept. 7.—The senatorial committee investigating campaign expenditures "is not seeking the best evidence" to prove Governor Cox's charges against the Republican party, Edmund Moore, the governor's personal representative, told the committee on the stand today. Moore told Senator Kenyon there were men better able to tell the Republican plans than either he or Governor Cox, and asked why William Boyce Thompson, of New York, chairman of the Republican ways and means committee, and the "60 men of the paid organization" were not called.

Cox had no evidence to support his charges outside of what Moore brought to Chicago with him, the witness said.

As he spoke he unfolded a massive brief case and took out a stack of papers. Governor Cox sent him to Chicago, Moore said, "to give the committee a list from whom senators could get information to support the governor's charges."

He mentioned Harry Blair, first assistant to Fred Upham, Republican national treasurer, and several other employees in Upham's office. "Governor Cox has no evidence outside of what you have brought us?" Senator Kenyon asked. "I think not," Moore said.

Signs of friction developed when Chairman Kenyon questioned Moore about an interview he gave newspaper correspondents last Tuesday.
